(480) 875-1333 • hvenka17@asu.edu • [Linkedin](#) • [GitHub](#) • [Portfolio](#)

TECHNICAL SKILLS

Programming Languages: Java, Python, Ruby, C++, SQL, HTML, CSS

Frameworks & Libraries: Spring Boot, Django, Ruby on Rails, React

Databases: MySQL, MongoDB, Redis, Memcached

Cloud Technologies: AWS (EC2, RDS, S3), Docker, Kubernetes, Jenkins, Prometheus, Grafana

Certifications: AWS Certified Solutions Architect Associate, Docker Certified Associate

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Aug 2019 – Jul 2022

Freshworks Inc.

Chennai, India

- Optimized Jenkins CI pipeline with Git Hooks and AWS Spot EC2 fleet to run parallel Docker containers of unit tests on and decreased test execution time by 75%, from 2hrs to 30min.
- Invented 1-click deployment of monolith and microservice containers with Amazon ECR images and Kubernetes to deploy new version without product downtime and reduced deployment failures by 40%.
- Implemented blue-green strategy using Chef Automate to minimize MTTR by rollback to stable version.
- Resolved production outages in product microservices, replica lag in RDS databases and Amazon SQS during on-call roster by liaising with developers and SRE team to uphold 99.9% product uptime.
- Created fault-tolerant file uploader with S3 multi-part upload and maximized throughput by 25%.
- Implemented Prometheus alerts to monitor EC2 instance health, disk space, memory usage and RDS latency using metrics collected from Prometheus exporters included as instrumentation components.
- Designed Grafana dashboards to visualize Prometheus metrics and minimize mean time to resolution.
- Created Linux Cron jobs to generate daily reports of new signups, account upgrades and deactivations.

Software Development Intern

Jan 2019 – Jun 2019

Norton LifeLock (formerly Symantec)

Chennai, India

- Built communication SDK for Norton browser extensions using Chrome Message Passing API.
- Optimized redundant scans in Content Scripts and accelerated React component mount time by 50%.
- Implemented ring-based leader election strategy to gracefully recover from orchestrator node failure.

Web Development Intern

May 2018 – Jun 2018

Edlocus Solutions

Chennai, India

- Developed Python Django web app to solve virtual showroom use cases of truck customization.
- Restructured UI components with responsive HTML templates and decreased loading time by 30%.
- Enhanced design process of truck chassis, wheel and grill with drag and drop functionality.

RELEVANT ACADEMIC PROJECTS

Improving Cloud Service Provider Prices

- Created Python Django app to estimate selling price of cloud services with Analytic Hierarchy Process.
- Restructured pricing scheme of component services for 25% more profit without affecting brand loyalty.
- Optimized Quality of Service decision boundary search by 66% with Binary Search Technique.

Hacker News Mobile Reader

- Developed responsive React JS app to fetch daily articles using YCombinator News API.
- Incorporated social media buttons to share search result links over WhatsApp, Facebook and LinkedIn.
- Implemented single sign-on with Google and Facebook for effortless login experience.

EDUCATION

M.S. Software Engineering

Arizona State University, Tempe, AZ

2022 – 2024

GPA: 4.11

B.Tech. Computer Science & Engineering

SASTRA Deemed to be University, India

2015 – 2019

CGPA: 8.23
